City, Cebu 6000

SKILLS

- Languages:** JavaScript (ES6+), TypeScript, PHP, C++, C#, Python, SQL, MongoDB, Bash.
- Tools & Infrastructure:** Git, Docker, Linux, Vercel, Postman, CI/CD, Network Routing/Switching.
- Frameworks & Libraries:** React, Next.js, Node.js, Express.js, Tailwind CSS, Bootstrap.
- Practices:** Retrieval-Augmented Generation (RAG), NLP, Edge AI, IoT, Cybersecurity, BunJS.

EXPERIENCE

CHAT SUPPORT SPECIALIST

June 2024 - August 2024

Eperformax

- Resolved complex customer inquiries regarding e-commerce logistics and technical account issues.
- Maintained high CSAT (Customer Satisfaction) scores by providing efficient, real-time technical troubleshooting.
- Shopee Account

EDUCATION

BACHELOR OF SCIENCE IN INFORMATION TECHNOLOGY
University of Cebu Main Campus

Dec 2025

CERTIFICATIONS

- CCNAv7: Switching, Routing, and Wireless Essentials, Cisco, 01/01/25
- Introduction to Cybersecurity, Cisco, 03/01/25

TECHNICAL PROJECTS

ChronNav – Interactive Campus Navigation System | Capstone Project | June 2025 – Dec 2025

- Architected a cross-platform (Web and Mobile) navigation solution designed to optimize indoor facility discovery and campus accessibility.
- Engineered a user-centric interface to reduce "navigational friction," helping students and visitors locate specific classrooms and offices in real-time.
- Implemented spatial data mapping to provide accurate floor-to-floor directions within high-density campus buildings.
- Managed the full software development life cycle (SDLC), from initial requirement gathering to final deployment and testing.

CAMPass – Edge AI IoT Security System | October 2025

- Architected a smart access control system using ESP32-CAM and Firebase for real-time alerts.
- Implemented On-Device Face Recognition (Edge AI), eliminating the need for external cloud processing and reducing latency.
- Integrated an IoT-to-Mobile pipeline to provide secure, low-cost residential security.

National Election Simulation System | November 2025

- Developed a high-concurrency web platform designed to mimic the Philippine presidential election process.
- Engineered secure voting logic and real-time data visualization for polling results.

LibManage – Academic Library System | August 2024

- Built a full-stack Library Management Web-App for the University of Cebu to automate book tracking and member records.
- Optimized database queries in SQL to handle high volumes of transaction data.
