SKILLS

- Languages:** JavaScript (ES6+), TypeScript, Python, SQL (PostgreSQL, MySQL), C++, C#, HTML5, CSS3, Bash.
- Frameworks & Libraries:** Node.js, Express.js, React, Next.js (App Router), Nuxt.js, Vue.js, Tailwind CSS.
- Tools & Infrastructure:** Git, GitHub, Supabase, Vercel, Railway, Render, Postman, Cisco Packet Tracer.
- UI/UX & Creative:** Figma, Google Stitch, Canva, Adobe Photoshop, Wireframing, Responsive Design Systems.
- Practices & Specializations:** RESTful API Design, Retrieval-Augmented Generation (RAG), Prompt Engineering, Edge AI, IoT (Arduino, ESP32), QA Testing.

EXPERIENCE

FRONTEND LEAD & FULL-STACK DEVELOPER

UC-METC Community Cooperative

June 2026 – August 2026

- Led UI/UX design and frontend development in a 4-person team, building a responsive loan monitoring web app using Tailwind CSS.
- Supported backend engineering with Node.js/Express REST APIs and optimized PostgreSQL schemas for multi-tier amortization calculations.
- Partnered cross-functionally to resolve formula edge cases, launching a production system that cut client auditing time by 60%.

CHAT SUPPORT SPECIALIST (Shopee Account)

Eperformax

June 2024 – August 2024

- Resolved real-time customer escalations regarding e-commerce logistics, payment gateway errors, and account security.
- Maintained top-tier Customer Satisfaction (CSAT) and First Contact Resolution (FCR) ratings through systematic troubleshooting and active ticket management.
- Collaborated with tier-2 technical teams to document recurring edge cases and streamline knowledge-based articles.

EDUCATION

BACHELOR OF SCIENCE IN INFORMATION TECHNOLOGY

University of Cebu Main Campus

June 2026

CERTIFICATIONS

- CCNAv7: Introduction to Networks
Cisco (06/11/2024)
- CCNAv7: Switching, Routing, and Wireless Essentials
Cisco (01/2/2025)
- CCNA: Introduction to Cybersecurity
Cisco (03/18/2025)

TECHNICAL PROJECTS

ChronoNav – Interactive Campus Navigation System | Capstone Project

June 2025 – December 2025

Stack: Next.js, TypeScript, Supabase (PostgreSQL), Tailwind CSS, Vercel

- Built a GPS-independent indoor navigation and room scheduling platform assisting 1,000+ campus visitors and eliminating classroom collisions.
- Engineered a custom vector-based route visualizer and secured room allocation data using Supabase Auth and Row-Level Security (RLS).
- Led frontend UI/UX architecture and full SDLC deployment, earning distinction at the Capstone defense.

UC-METC Coop Loan Monitoring System | Freelance Project Web Application

June 2026 – August 2026

Stack: Node.js, Express.js, PostgreSQL, Tailwind CSS, Railway

- Developed a financial record-keeping system with dynamic ledger updating, interest computation, and loan status reporting.
- Implemented secure token-based authentication and parameterized SQL queries to protect sensitive financial records.
- Deployed the containerized backend and database onto Railway with automatic SSL and database backups.

CAMPass – Edge AI IoT Security System | Academic

October 2025

Stack: ESP32-CAM, Arduino IDE, Edge AI Computer Vision, Firebase, Servo Relays

- Architected a smart access gate running on-device facial recognition via ESP32-CAM, achieving sub-second offline unlock speeds.
- Interfaced hardware relays with Firebase to trigger automated door strikes and push instant security alerts.

SkyCast OS – Interactive Weather Intelligence Platform | Personal

January 2026

Stack: React, Node.js, HTML5 Canvas API, OpenWeatherMap API, Tailwind CSS, Vercel

- Built a real-time weather dashboard featuring dynamic canvas particle simulations responsive to live weather conditions.
- Optimized high-frequency canvas rendering loops to sustain consistent 60 FPS performance across mobile and desktop.
